DETAILED ACTION

1. Amendment filed 12/5/06 has been entered. currently claims 2-28, 55-70, 80-100, 102-118 are pending.

Claim Rejections - 35 USC § 103

2. Claims 98-100 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wolf et al. (U.S. Patent No. 6,238,456).

Wolf et al disclosed a tantalum agglomerate powder having specific surface area ranging from 1.4 to 3 m²/g, a metal contaminant such as sodium of less than 50 ppm, a primary grain diameter of 100 to 400 nm.

The difference between the claim and that of Wolf et al. is that the claim recites primary particle size of 1 to 100 nm. However, since Wolf et al teach the powder with primary particles whose size range overlaps that recited by the claim, it have been obvious to one of ordinary skill in the art to select any portion of range, including the claimed range, from the broader range disclosed in the reference because the reference finds that primary particles whose sizes in the entire disclosed range has a suitable utility. --- Note: Even if a reference teaches a preferred range within a broader range, it still does not "teach away" from the claimed invention. See MPEP 2123.

3. Claims 2-28, 55—70, 80-97, 102-118 are deemed allowable.
